	Construction of the new iron and steel foundry Nowa planned and carried out by the Russians. It has be intensive propaganda campaign, and an expansion pro awaiting technical documentation from the Soviet Un	on the subject of an
2,	It is planned to enlarge the mechanical workshop, g munication, and the forges and steel construction w workshop, orders have been placed with the engineer of Mechanical Installations Industry, Pruszkow (R53 lathes, 17 frame drilling machines, one milling mac for shafts and holes, and 15 two-way drilling machines workshop in Poznan has received orders for one circ machines, two revolver (s1c) lathes, and two grinding mechanical workshop will also receive six horizontal lation of Toytile Industry in Industry	orkshop. For the mechanical ing workshops of the Union /P88), for 17 high speed hine; two grinding machines nes. The Stalin Metal Industry ular saw, three beam drilling high machines for lather.
3.	For two garages and communications at Nowa Huta, the Union of Mechanical Installations Industry is to provide two band saws; six frame drilling machines; one 50X1-HUM milling machine; one lathe; eight grinding machines, one of them for shields; and an installation for gauging faults in cables, obtained	
	an integration for gauging faults in capies, obtain	one of them for shields; and
	an integration for gauging faults in capies, obtain	one of them for shields; and ned center for electrical apparatus)
4.	through Elektrim (import of A horizontal shaping machine is to come from the Unione grinding machine for valves Type M-A (sic) has a	required the ordering of one for the Union of Mechanical
4. 5.	through Elektrim (import of through Elektrim (import of through Elektrim (import of the unit one grinding machine for valves Type M-4 (sic) has a (import center for machine tools). Plans for expansion of the forges at Nowa Huta have frame drilling machine and two grinding machines. From the workshop, two frame drilling machines were ordered for Installations Industry; one band saw and one beam drints Metal Industry Workshop; and one saw from the Stalowa Wola (R51/Q70). Before 10 March 1951, delivered three anvil supports weighing 9570 kg (significant of the same supports weighing 9570 kg (significant of the same supports weighing 9570 kg (significant of the supports weighing 9570 kg (significant of the same supports weighing 9570 kg (significant of the same supports weighing 9570 kg (significant of the supports)	required the ordering of one for the steel construction from the Union of Mechanical dilling machine, from the Stalowa Wola Works at
